

SV52

2-way Normally Open
Diaphragm Isolation Construction

Valcor General Purpose Series

DESCRIPTION

The SV52 series is a direct acting, 2-way normally open, diaphragm isolation solenoid valve. Valcor designed this series valve with a diaphragm to isolate the valve's metallic parts from the media being handled. Available with polypropylene and PTFE body combined with Viton, EPDM or PTFE diaphragm, this series handles a wide range of fluids.

APPLICATIONS

The SV52 series is suitable for a broad range of industrial applications. Typical applications include:

- Sterilizer
- Chemical dispense
- Water treatment
- Photo processing/ink handling
- Vacuum Applications

FEATURES

- Inert construction for use with wide range of fluids
- Bubble-tight shut-off
- High flow in compact design
- Direct acting construction
- Mountable in any position

VALCOR SV52 SPECIFICATIONS

Construction

Valve Parts in Contact with Fluid

Body	PTFE, Polypropylene
Diaphragm	PTFE, Viton or EPDM

Other Parts

Body Seal	Buna-N or Neoprene
Plunger Tube	303 SS
Plunger	430F SS
Shading Coil	Copper
Plunger Stop	430F SS
Spring	303 SS

Electrical

Standard voltages	115/60 AC & 24/VDC. Consult factory for other voltages (available)
Wattage	10 watts for 115/60 Hz and 24 VDC constructions
Standard coil housing	Coils have class B insulation and 18" leads. General purpose with 1/2" NPT conduit. Explosion proof and grommeted pigtailed housing are also available. Consult factory. Replace 1st "C" in part number with "E" for explosion proof Replace 1st "C" in part number with "G" for grommeted pigtailed Example: SV52E19G24-1 for explosion proof solenoid housing
